1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. The Information Disclosure Statements submitted by Applicant on March 24, 2006, October 6, 2006 and February 1, 2007 have been received and fully considered.
3. The drawings are objected to because Figure 17 should be labeled as --PRIOR ART--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
4. Claims 1-5 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The closest prior art to the present invention is the conventional memory admitted by Applicant in Figure 17. The conventional memory device comprises a main memory cell coupled to fuse circuits (memory space serving means), row-wise and column wise redundant memory cell (redundant memory means), and redundant row and redundant column selector circuits (allocating means). The conventional memory device fails to show or suggest the identification number storing means and relief command input means wherein the allocating means is operated in such a manner that when an identification number included in a relief command does not coincide with an identification number stored in the identification number storing means, a memory space corresponding to a defect existing in the main memory means of another memory apparatus specified by the relief command inputted to the relief command input means is replaced with a memory space of the redundant memory means of the memory apparatus of interest.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
